## You design - we make it happen

TK-Team is your expert in acoustic products, writing and notice boards and interactive touch screens. Our high-quality products create a comfortable acoustic environment and they can be used to improve visual presentations.

We will incorporate your plan starting with the design and manufacturing of the products, ranging all the way from selection of the product to the installation. We want to understand the possibilities and requirements of your space. With our years of experience, we understand the needs of our customers and our expertise ensures the high quality of our products.

If you are unable to find a solution for your specific need,  
you can design it yourself - and we will implement it.

## WRITING BOARDS | Ceramic steel e3

The enamel steel writing board is suitable for rooms where durability, usability and hygiene are important. The surface of the writing board can be dry-wiped, is easy to clean and withstands disinfectants. The enamel steel e3-surface we use is hard as granite and we issue it a lifetime warranty.

There are several different size, colour and trimming options available for the white boards. In addition, we manufacture tailored sizes according to the exact dimensions you need. We specialise in larger writing surfaces, up to full-wall solutions. We can also manufacture white boards with unconventional dimensions using laser cutting.

## Whiteboards

High-quality e3 ceramic steel whiteboards for professional use

Colour options for whiteboard surfaces

## Chalkboards

Durable classic e3 ceramic steel chalkboards for schools

Colour options for chalkboard surfaces

## Trimming options

Choose a trimming to match your decor.

### ULTRA Stylish writing surfaces

Due to lightweight concealed mounting and precision-cut angle trimming, the Ultra writing board is a reliable choice for the style-conscious designer. Any of the RAL colour chart colours can be specified as the trim colour. A popular solution for business use.

### SKY The floating illusion

The backward slanted edge makes the whiteboard seem to float on the wall surface, creating a lightweight airy appearance. Due to its hidden mounting, the board merges with the wall. Modern style for business sites with high-standard requirements.

### WOOD A timeless choice

Natural wood invokes positive associations. Different types of wood trims can be used to create the decorative look required for the space. In addition to solid wood, the surface can also be made of beechwood or birch veneer.

**PRO Writing Board**  
with a short penshelf, length 300 mm.

**PRO Writing Board**  
with full length penshelf at full-board length

### PRO The professional choice

The choice of schools and universities, when the space requires large writing surfaces that can be connected. The trim of the whiteboard is the Pro aluminium trim which is framed by angled corner pieces. Pro writing board is available with full length penshelf or short penshelf.

## HUSH ACOUSTIC WHITEBOARD

### Practical acoustic control

The beautiful Hush Acoustic Whiteboard delivers in two ways: it serves as sound insulation by cutting out background noise while it also functions as a writing surface. Select the trimming to match the colours in the room.

## WHITEBOARD CONFERENCE CABINET

### Protected from view

The cabinet can be furnished by combining different types of enamel steel writing surfaces, flipcharts and projection screens. The frame of the writing cabinet can be made of solid wood, beech, birch, cherry or oak veneer. Also available in melamine.

## WINGET BOARDS

### More practical work space

Does your board need more writing space? The two-sided wing board is attached to the edge of the wall board using hinges. Winget boards are available whiteboard or chalkboard surfaces.

## SLIDING DOOR BOARDS

### Writing surfaces as doors for the cabinet

The sliding door boards are always sized based on the cabinets. Several different colours can be specified for the panels, allowing the wall to serve as part of the décor of the room. The sliding door board can also be made with a projection surface, rendering a separate projection screen unnecessary.

## COLUMN BOARD WRITING SURFACE

### Maximum writing surface

The Column board is a long-time favourite of English universities. The boards can be effortlessly moved vertically between one another. The counter-weights and high-quality bearing systems allow the boards to glide effortlessly and silently.

## WRITEWALL Writing surface

### The whole wall for your ideas

WriteWall is always tailored based on the dimensions of the wall on-site. It is made out of e3 CeramicSteel panels. The panels are attached to one another creating a nearly seamless working area. The stylish, thin, colour-matched WriteWall trimming finishes the beautiful writing wall solution.

## FULL WIDTH Writing boards

### A writing surface for the full width of the wall

The writing boards are cut according to the dimensions required by the floor plan. The end result is a practically seamless solution and is an excellent choice for example for large auditoriums.

## WRITING BOARDS | Glass

Glass writing boards create a special atmosphere with their high quality, style, design and colours. The boards can be installed side by side and using the wide range of different colours, distinct look for the entire wall can be created. You can write and draw on the glass board surface using regular whiteboard pencils and erasers.

Both glass board thicknesses can be manufactured as round or other special shapes according to the dimensions you require, up to 3,500 x 2,200 mm in size.

## Glass writing boards

Our glass boards are always tempered, CE-marked European safety glass and their corners have been rounded to improve safety. The BS 6262-4 marking and ability to lock the mounting into place ensure the product can be used safely in public settings.

The colour is added to our products by enamelling it to the surface of the glass, which ensures the colour adheres to the surface and that the glass board can be securely mounted to the wall.

The glass surface has a lifetime warranty.

You are able to select a suitable colour from our range of 23 standard colours. Additional colour options are available using the entire RAL colour map.

**Glass writing boards are available in two thicknesses.**

### 4 mm glass writing boards

The 4 mm glass writing boards can hold magnets, which allows you to also use them as notice boards. The strong Neo magnets are specifically designed to be used with the product.

### 6 mm glass writing boards

The 6 mm glass writing boards can be made especially large and they are used especially with large implementations, such as solutions that cover the entire wall.

Both glass board thicknesses can be manufactured as round or other special shapes according to the dimensions you require. In addition to the wall mounted glass boards, our range also includes mobile alternatives.

## GLASS WRITING BOARDS

### Modern alternative for business environments

The colour is enamelled to the glass surface, which ensures a fresh and durable colour tone. The glass writing boards can be installed next to one another using the wide range of different colours, which creates a distinct look for the entire wall.

Available also distinct glass accessory boxes for markers and erasers.

### GLASS WRITING BOARD, 4 mm

#### Multi-use glass surface

The surface of the 4 mm glass writing board is magnetic, so notes can be added among the text.

### GLASS WRITING BOARD, 6 mm

#### A stylish alternative to a traditional whiteboard

The 6 mm glass boards can be made in large sizes and they are used especially with large implementations, such as solutions that cover the entire wall.

## COLUMN GLASS BOARDS

### Maximum writing surfaces

The Column boards with glass is a unique entity which offers a lot of writing surface during lectures, for example. The boards can be effortlessly moved vertically between one another. The counter-weights and high-quality bearing systems allow the boards to glide effortlessly and silently. Hundreds of RAL Classic colour map colours are available to choose from.

## ROUND GLASS writing boards

4 mm and 6 mm

### Multi-use eye-catcher

## RADIA GLASS writing boards

4 mm and 6 mm

### A soft look for your décor

The stylish rounded edges soften the look of the Radia glass writing board. This board is a decorative piece that can also be used for writing and attaching notes using strong Neo magnets.

## NOTICE BOARDS

The materials of the notice board affect the décor of the room with their softness, lightweight appearance, colours and natural tones. Fabric, cork, Bulletin Board or linen can be used as the surface material. Our fabric and linen boards belong to the M1 indoor air class.

We also offer notice boards in special sizes according to your specifications and with the desired fabric option.

## Fabric Board

The standard fabric is the high-quality, 100 % Max Cotton fabric, available in 25 different colours. Also available in special sizes according to your specifications and with the desired fabric option.

### TRIMMING OPTIONS

PRO, ULTRA, SKY, WOOD

## Linen Board

Light-toned linen is suitable for many types of environments. A beautiful linen board creates a sense of softness. The popular linen board holds M1 indoor air rating.

### TRIMMING OPTIONS

PRO, ULTRA, WOOD

## Cork Board

Traditional cork boards with natural cork surface.

### TRIMMING OPTIONS

PRO, SKY, WOOD

### TRIMMING OPTIONS

PRO, ULTRA, SKY, WOOD,  
L-EDGE TRIMMING, MDF-EDGE TRIMMING

## Bulletin Board

Natural, renewable and sustainable cork linoleum. Cork linoleum boards are made of natural materials and have durable surfaces for posting. You can specify the colour from Forbo's range of 15 colours. Made from renewable raw materials. A mixture of oxidized linseed oil, resin, cork and pigments gives it flexibility and elasticity. The product has anti-bacterial properties and does not collect dust, making it easy to keep clean.

## Notice Board Cabinet

A popular solution for public places, where the notices are locked up and protected. Linen, cork linoleum or a magnetic writing surface can be specified as the surface of the notice board. The available options for the frame include aluminium and birch. The birch frame can also be stained to create the desired finish.

## Trimming options

Choose a trimming to match your decor.

### PRO

Aluminium trim with angled corner pieces. The trimming can be cut to exact mitre angles and painted with desired RAL Classic colour chart colours.

### ULTRA

Airy concealed mounting with precision-cut angle trimming with desired RAL Classic colour chart colours.

### SKY

Slanted edge creates a light, airy appearance. Due to its hidden mounting, the board merges with the wall.

### WOOD

Natural wood invokes positive associations. Different types of wood allow you to create the decorative look required for the space.

## FABRIC BOARDS

## LINEN BOARDS

CORK BOARDS

BULLETIN BOARD

## COMBIBOARDS

By combining different fabric surfaces and the very hard e3 ceramic steel, you can create a suitable notice and presentation board combination for your specific requirements. The soft acoustic properties of the fabric board combined with the strength of steel enamel create a suitable contrast and ensure convenience during use.

The Combiboard's fabric is carefully installed behind the backboard. The board does not have a frame. You can specify the suitable solution for your space from our different fabric and colour options. In addition to the standard steel enamel surface sizes, we can manufacture the boards according to the specific dimensions you need.

## SKY Combi Board

### **Multi-functionality and modern style**

A combination of fabric and white boards that give the board room for both notes and writing.

The finished edge of the Sky board accentuates a modern, lightweight look. The standard fabric is the high-quality, 100 % Max Cotton fabric and it is available in 25 different colours.

Due to its hidden mounting and slanted edge, the board merges with the wall. Modern style especially for business environments.

## TOUCH SCREENS

Using a touch screen during presentation allows the audience to be included in a completely new way. All of the actions of the speaker can be carried out without losing the connection with the audience. The LED multi-touch screen is able to register up to 20 simultaneous touch points.

The opportunities created by the ease of use, 4K image quality and the built-in Android operating system coupled with wireless control are features that belong in a modern meeting or training room. All of the notes made on the screen can be saved and shared. The stylish and safe design and non-reflective 4 mm safety glass make the TK-Team Touch Screen a reliable and striking decorative piece for your premises. The PC software delivered with the touch screens is in Finnish and in English.

## Touch screens

### Modern solution for training rooms

Raise your presentations to a completely new level with interactive LED multi-touch screens.

Precise and reliable 20-point multi-touch, non-reflective and durable 4 mm safety glass. The built-in Android operating system allows diverse compatibilities with different control devices and data processing methods.

## Screen Stands

### ST01 Stand

Suitable for touch screens of the following sizes: 55", 65", 70", 75" and 86". The stand is black and it has four wheels that can be locked and a shelf for supplies. The touch screen can be mounted at four different heights on the stand.

Dimensions: W 1295 x H 1620 x D 645 mm

Shelf dimensions: W 800 x D 400 mm

### Electric stands

TK-Team stands as well as various Conen stand models available. See more on our website.

## Touch Screen accessories

### MT21i5S Computer Module

A computer module is available for the TK-Team Touch Screens. It is easy to install to the touch screen also at a later time and it has diverse connection capabilities.

### WIRELESS SM04

### TOUCH AND SCREEN TRANSFER SYSTEM

Quick and easy method to connect a computer directly to the touch screen. Share content from your computer with ease and focus on the presentation without having to worry about the system working properly. No more need to search for cables and adjusting the screen resolution. The delivery includes one USB transmitter (USB 2.0) and one USB receiver.

## Software

Included with touch screens

### NOTE3

Write on the screen and take notes. Editing images and videos is easy, the program supports multi-touch, so changing the size of images and the video is effortless.

### CAPTURE

Conveniently save the actions occurring on the screen for later use for example as training materials. Utilise an external camera and save videos. Video editing capabilities included.

### CONNECT

Mirror your Android and iOS device with the TK-Team Touch Screens effortlessly using the wireless network. Share the images, videos or e.g. PowerPoint materials from your mobile Android or iOS device for everyone to see on the TK-Team Touch Screens. Connecting is easy and quick using the QR code on the screen.

## PROJECTION SURFACES AND SCREENS

We offer a wide range of projection electric and manual projection screens for different purposes. Our standard projection screens are of excellent quality for the price and they are suitable for most needs. If you would like the flagship of projection screens, however, your choice is the Da-Lite.

Instead of projection screens, you can also use fixed projection surfaces. WetWipe is a completely matt projection surface, which can be used like a screen and also occasionally as a writing surface when needed. WriteScreen, in turn, is the real all-rounder of projection surfaces. You can use the board as a writing surface without losing the projection characteristics of a projection screen. The WriteScreen is designed for use with short-throw projectors.

All of your projection surfaces can be tailored to the exact dimensions you require.

## Fixed projection surfaces - one product, two ways to use

### WriteScreen

WriteScreen projection and writing surface is a space-saving choice. The high-quality ceramic low-gloss white e3 CeramicSteel surface can be cleaned with a dry-wipe to erase the writing from standard board marker pens. RAL Classic colour chart colours are available for the trimming. The writing surface has a lifetime warranty. Our range includes several different sizes and aspect ratios.

#### TRIMMING OPTIONS

PRO, PRO BLACK, ULTRA, SKY

### WetWipe

WetWipe is a projection screen that can be occasionally used as a writing surface. Matt white high-quality ceramic e3 surface is recommended to be cleaned during the same day with a wet wiper when written on with standard board marker pens. The writing surface has a lifetime warranty. Our range includes several different sizes and aspect ratios.

#### TRIMMING OPTIONS

PRO, PRO BLACK, ULTRA, SKY

### MaxiScreen

Unique projection and writing surface, designed to be used with an interactive projector equipped with a separate laser module. The MaxiScreen projection surface provides maximum projection area for an interactive projector. Compatible projection surface for Epson projectors.

The high-quality ceramic semi-gloss white e3 surface with PRO trimming. Can be cleaned with a dry-wipe to erase the writing from standard board marker pens. The writing surface has a lifetime warranty.

## Projection Screens

### DA-LITE Projection Screens

The legendary Da-Lite projection screen range includes solutions for any need, even for the most demanding customer projects. Both electric and manual projection screens are available.

### Manual Projection Screens

Versatile installation options for all applications. Can be installed directly on a wall, ceiling or console. Viewing angle 60° and reflection coefficient 1.0.

### Electric Projection Screens

High-quality matt white three-layer screen with a silent electric motor. The viewing angle 60°, the reflection coefficient 1.0. A wireless remote available as an accessory.

### Tripod Screens

Compact projection screen for any space with easy-to-use mechanism. Telescopic rod. Square 1:1.

## PRO WriteScreen

### One product, two ways to use

Finished using black Pro aluminium trimming with angled corner pieces. The trimming can be cut to exact mitre angles and be painted with the desired RAL Classic colour chart colours. WriteScreen is mounted through the holes in the trim with a screw on the wall to ensure a firm and durable attachment to the board. Pro WriteScreen is suited for use with both ceiling and wall-mounted projectors

## Ultra WetWipe

Due to airy concealed mounting with precision-cut angle trimming, Ultra WetWipe projection surface is a popular choice for business use.

## PRO Black WetWipe

Finished using black Pro aluminium trimming with angled corner pieces. The trimming can be cut to exact mitre angles and be painted with the desired RAL Classic colour chart colours. Suitable for both ceiling and wall-mounted projectors. Our range includes several different sizes and aspect ratios.

## White Screens

We offer a wide range of electric and manual projection screens for all applications:  
 Standard high-quality matt white three-layer screen  
 projection screens  
 and the out-standing Da-Lite projection screen range.

Combine projection surfaces with writing boards and select compatible edge trimmings for a stylish and a versatile combination to cover the entire wall.

## ACOUSTIC PRODUCTS

Hush acoustic panels are used to remove echoes from rooms and improve speech audibility. We use the best A-rated sound absorption material on the market in our products. Our acoustic panels provide colour and style to your room, our range includes several fabric, colour and shape options. We can tailor a suitable acoustic panel solution just for you and even print the picture you want on it. The flexibility with the colours and surface materials allows the product to serve as an impressive decorative element. The Hush acoustic panels are an effective sound absorption solution for rooms of all sizes, from small offices to large public facilities.

The HushPod filters out the outside background noise and removes the echoes from the room. A sound-filtered space helps people focus and serves as a sound shelter. The HushPod is easy to use; it is enough to just step in.

## Hush & Hush Sky Acoustic Panels

Hush Acoustic Panels are covered with Max Cotton 100 % fabric with 25 colour options. You can also specify your own preferred fabric or print the picture you want on the panels. The frame of the panels is a 50 mm deep wood frame. The sound deadening material is a 50 mm wool sheet with M1 rating. In addition to the several standard sizes, you can order the product in a special size and shape, for example round.

## Hush Ecophon Acoustic Panels

The panels are constructed using Ecophon acoustic panels and TK-Team's unique trim solution. The panels are made of 40 mm M1-rated sound insulation material, on top of which you can choose a suitable colour fabric from the 16 available colour options. The trimming of the acoustic panels can also be painted in the colour you prefer. The acoustic panels can also have printed pictures as desired. The prints can be made of pictures supplied by the customer or using a picture archive.

## HushPod

The HushPod Meeting Space is a work area with one open wall. HushPod filters out the external background noise and dampens the sounds from being heard outside.

HushPod is available for four and six persons.

The panels have been issued the Nordic Swan Ecolabel and they are fully recyclable. The wall panels are always tailored to suit each site and by combining panels, large-scale solutions are also possible.

## PhonePod

The Hush PhonePod is a work area with one open wall. The area is effectively insulated from the sounds of the environment. The phone booth is sized to suit one person and can be installed in all spaces. Acoustic panels installed on the side walls and ceiling of the TK-Team PhonePod effectively filter out the background noise.

Hush Ecophon Acoustic Panels  
Decor with sound absorption

Hush SKY  
Acoustic Panel

**The floating illusion**

The fabric folded over the slanted inward edge and the hidden mounting fittings make the panel merge with the wall.

Hush Acoustic Panels  
Live up your wall surfaces with acoustic panels

## HushPod 6

### A sound-deadening meeting room for six

The area is effectively insulated from the sounds of the environment. Excellent for meetings and work that requires the ability to concentrate.

## PhonePod

### A sound-deadening phone booth

The panels effectively filter out the background noise and prevent the conversation from being heard outside the PhonePod.

## MOBILE BOARDS AND WALLS

Mobile boards and wall panels are designed for spaces where wall-mounting is not possible or wall-mounted boards are not sufficient. High-quality and easy-to-use elements help with your daily routines and the comprehensive colour range offers a lot of options for your interior.

The focus with our products is primarily on functionality and reliability, while also considering a stylish appearance.

## Mobile & Mobile Radia Glass Writing Boards

The stylish and durable Mobile Glass Writingboard with a sturdy steel stand replaces the traditional marker board. The colour is enamelled to the glass surface, which ensures a fresh and durable colour tone. Notes can be attached to the magnetic surface. You can also use the Mobile Glass Board with hooks as a flipchart.

## Mobile 4 mm & 6 mm Glass Writing Panels

A stylish decorative piece and a diverse writing platform for any room. The colour is enamelled to both sides of the panel, which creates a fresh and durable finish with a lot of top-quality writing area. The stand is available in black, white or gray and has four wheels, two of which can be locked. You can also use the Mobile Glass writingboard panel with hooks as a flipchart. The 4 mm Mobile Glass Writingboard is magnetic.

## WorkWall

### Adaptable panel with fresh look

A presentation surface with convenient mobility. The surfaces can be made of different types of materials; durable steel, colourful glass, 100 % Max Cotton fabric or Ecophone. The panel can serve as a projection surface, writing surface or notice board. By using different colour frames, you can create a bold look to your space according to your needs.

The stand is available in two designs and several colour options.

## Team Work Easel

The modern and practical solution for a creative operating environment, a mobile, double-sided steel enamel writing surface. The writing surfaces are magnetic. An adjustable flip-chart holder is mounted on the other surface. The high-quality wheels and collapsible stand allow the panel to be effortlessly transported and stored.

## Flip-charts

A durable flip-chart with a sturdy steel stand when working with limited wall space. The surface can be made of durable and magnetic white e3 steel enamel or glass. The board has aluminium trimming and a pencil shelf for the full width of the board.

The mobile boards and wall panels adjust to your decor.  
You can choose the functionality based on your needs including writing or projection surfaces, notice boards or acoustic control.

### Presentation Wall

**A versatile presentation wall for when wall space is not available**

In addition to its presentation capabilities, the Mobile Presentation Wall can be used as a noticeboard and as a space divider. Storing the panels requires very little space and the mounting clips allow the walls to be attached to one another. The available surface options are 100 % Max Cotton surface or a white e3 steel enamel marker and magnetic surface with flip-chart holder. Aluminium trim and grey stand with four lockable wheels.

## PRO Mobile Writing Board

### The mobile writing surface when working with limited wall space

A mobile magnetic writing surface when you need more space for notes and there is limited wall space. You can specify between marker or chalk surfaces, reflection surface and between single or double-sided boards. Anodised or black trim give the Pro Mobile Writingboard a stylish look. This tool for professionals stands firmly on its steel legs.

## Hush Acoustic Mobile Panel

### Eliminates background noise

The Hush Acoustic Mobile panel serves as both a space divider and a noise-reduction panel. The mobile panel is constructed using Ecophon acoustic panels and TK-Team's unique trim solution. The trims can be painted in the colour you choose.

Ecophon acoustic panels are 40 mm thick acoustic panels. You can select the desired colour from the Texona fabrics. You can also have an image printed onto the panel to freshen your work environment. The panels have been issued the Nordic Swan Ecolabel and they are recyclable.

The wall dimensions are W 1200 x H 1900 mm and it is easy to move from location to another.

## OTHER PRODUCTS AND ACCESSORIES

We offer various accessories, such as accessory boxes, pencil shelves, magnets, markers and cleaning detergents for both steel enamel and glass writing surfaces.

We also manufacture rail systems, which allow projector screens, map lifts and map tubes to always be available and movable to the correct position. Different types of rails and the necessary accessories are also available. We also have the supplies for installing and operating projector screens.

## Accessories for ceramic steel and glass writing boards

### Writing Board Start Kit

Includes a marker set (4 pcs), a board eraser, 10 replacement surfaces, 10 board magnets and a high-quality cleaning solution for writingboards.

### Pilot markers

High-quality Pilot markers for steel enamel and glass writing surfaces. Colours are blue, red, black and green.

### Marker holder

A handy magnetic holder for four markers. The holder is suitable for steel enamel writing surfaces.

### Magnetic eraser

For all writing surfaces. Equipped with a magnet. Replacement surface kits also available.

## Stylish glass supply boxes for business environment

### Glass Supply Box, large

The glass door can be matched with the colour of the glass writingboard with Optic White or another colour from the colour chart. Magnetic rear wall to attach the included magnetic pencil holder.

### Supply Box, small

The front panel can be coloured in the same tone as glass boards, Optic White or glass colour chart colours. Aluminium frame. Non-magnetic. Also available powder-coated frame and front panel without glass.

### Neo-magnets for glass boards

Strong magnets especially designed for glass boards. The colour is brushed stainless steel and the diameter is 30 mm.

### Steel enamel writing board magnets

Colour options include yellow, blue, red, green, black and white. The magnets are delivered in bags of 10.

## Slide rail system

The slide rail allows the projection screens, map lifts and tubes to be moved to the desired position on the wall. The colour of the rail is white. The length is 6000 mm. The rail can be attached either directly to the ceiling or to the wall or ceiling consoles.

Various supplies are available for the slide rail system, including mount fitting, end stops, sliders or map lift.

## Accessories for projection screens

Projection screen wall console

Projection screen ceiling console

Operator switch for electric projection screen

RF02 radio controller for electric projection screen

## MATERIALS

### Enamel steel e3

The e3 CeramicSteel surface we use is hard as granite and we issue it a lifetime warranty. The enamel steel writing board are suitable for rooms where durability, usability and hygiene are especially important. The surface of the whiteboard is dry-wipeable and easy to clean. It is also anti-bacterial, which allows it to be used in hospitals, for example. 99% of the materials of the surface are recyclable, which has led to the Cradle-to-Cradle Bronze certificate being issued for the steel enamel surface.

### Glass

Our glass is sourced from Europe. The colour enamelled to the surface of the glass, which ensures the colour adheres to the surface and that the glass board can be securely mounted to the wall. Our glass boards are always tempered, CE-marked European safety glass and their edges have been rounded to improve safety. The ability to lock the mounting of the glass board into place ensures the product can be safely used in public sites, as demonstrated by the BS 6262-4 marking issued in accordance with the UK standard.

### Ecophon

Our Ecophon acoustic panels are made using Ecophon acoustic materials and TK-Team's unique trimming. Images can be printed on the Ecophon surface. Ecophon panels have been issued the Nordic Swan and they are fully recyclable. The product holds the following certificates: M1 indoor air rating, The Indoor Climate Label, and Astma och Allergi Förbundet.

### Bulletin Board

The Bulletin Board is made of renewable materials. The mixture of fermented linseed oil, resin, cork and pigments gives the product its distinctive flexibility and resilience. Due to these properties, the product is highly sustainable and ecological. The durable material does not crumble or deteriorate like traditional materials, such as cork or porous fibreboard. The product has anti-bacterial properties and does not collect dust, making it easy to keep clean. These properties make it a practical option for classrooms. Due to its anti-bacterial characteristics, the product is also suitable for healthcare applications.

### 100% Max Cotton fabric

The standard fabric for notice and acoustic boards is the high-quality, 100 % Max Cotton fabric. It has been woven using only the best natural materials and designed especially for boards and upholstering furniture. The notice board made of the fabric holds an M1 indoor air certificate and the fabric can be approved in the fire safety test conducted in accordance with EU standards. 25 colour options of the Max Cotton fabric are available.

### Linen

Our linen boards has M1 indoor air rating certified.

### Hush acoustic panels

Hush acoustic panels use a sound insulation panel with M1-certification. The panel is upholstered with high-quality Max Cotton fabric, which has been approved in a fire safety test conducted in accordance with EU standards. Upon special request, it is also possible for the customer to specify their own fabric.

### Fibreboard

The fibreboard we use is E1-certified.

## Colours

Note! Printed colours are not a exact match with the real colour of the materials.

### Colour options for whiteboards

### Colour options for chalk boards

### Colour options for Bulletin Boards

### Colour options for Texona fabrics

### Colour options for glass surfaces

Also other colours available from the RAL classic colour chart,  
**Note!** RAL classic colour chart colours starting with a number 4 contain heavy metals and **are not suitable** for glass boards,

### Colour options for Max Cotton 100% fabrics

TK-Team Oy Ab is a Finnish company established in 1972. Since then, it has operated as an industry pioneer and expert in acoustic and visual presentation solutions. We operate in over 20 countries through our subsidiaries and distributors, in addition to our own company. Since 1998, we have had a factory in Estonia. We established our subsidiary in Great Britain, TK-Team Ltd, in 2007. We currently employ 45 people.
