

# HUSH ECOPHON ACOUSTIC PANELS

Decorate while sound-insulating

The acoustic wall panels are constructed using Ecophon acoustic panels and TK-Team's unique trim solution. Ecophon Acoustic Panels are made of 40 mm M1-rated sound insulation material, on top of which you can choose a suitable colour fabric from the 16 available colour options. The trims of the acoustic panels can also be painted in the colour you prefer. The acoustic panels can also have printed pictures as desired. The prints can be made of pictures supplied by the customer or using a picture archive.

The panels have been issued the Nordic Swan and they are fully recyclable. The wall panels are always tailored to suit each site and by combining panels, large-scale solutions are also possible.
