

HUSH SKY ACOUSTIC PANEL

The floating illusion

Hush acoustic panels are used to remove echoes from rooms and improve how well spoken word is heard. Hush Sky Acoustic Panels are covered with Max Cotton 100 % fabric. The customer is also able to specify their own preferred fabric, if so desired. You can also print the picture you want on Hush Sky Acoustic Panels. In addition to the several standard sizes, you can order the product in special sizes.

The frame of the panels is a 50 mm deep wood frame. The sound deadening material is a 50 mm wool sheet, which has a M1 rating. The edge of the Hush Sky Acoustic Panel is slanted inward and the fabric is folded over the back. There are hidden mounting fittings behind the panel. The panel merges with the wall.

You design –we make it happen
