

## WRITING BOARDS | Glass

With their high quality, design and wide range of colours Glass writing boards create a special atmosphere. The colour is created by enamelling the glass, which ensures the colour is fused into the glass and can be securely mounted without risk of delamination.

Our glass boards are tempered, CE-marked European safety glass and their corners have been rounded to improve safety. The BS 6262-4 marking and ability to lock the mounting into place ensure the product can be used safely in public settings. Available in a standard range of 23 colours. Additional colour options are available using the RAL colour chart. Only 4-color colors are not suitable for glass boards because they contain heavy metals.

You can write and draw on the glass board surface using regular whiteboard pen and erasers.

The magnetic glass boards allow you to use them as notice boards. Our glass boards can be produced in large sizes or multiple panels that cover the entire wall. Glass boards can also be manufactured as round or other special shapes. Our range also includes mobile alternatives.

*You design -we make it happen*
