

NO FLYZONE Projection Screens

Specialist over sized screens for interactive projectors that require a no fly zone.

TK-Team has developed a range of screens that in addition to the formatted image size have an extended surface for the mounting of a finger touch module and its calibration.

Screen surfaces are extended beyond image sizes to the manufactures specific no fly zone requirements for calibration.

- Choice of image size and ratios.
- TK-Team WetWipe, WriteScreen or Projecto surfaces available.
- Option to combine your screen and magnetic dry-wipe writing surface.
- Trimmed in silver, white or black Standard or Ultra Trim.
- The perfectly flat surface has six point fixings and is fully adjustable.
- Conforms to DIN 90145 creating high uniformity and picture quality.
- All TK-Team surfaces are scratch hardened, stain, chemical and free resistant.
- Made from minimum 50% post-consumer and post-industrial waste.
- The product is recyclable.
- Available in silver, white or black Standard or Ultra Trim.
