

T90" & T120" SCREENS FOR THE EPSON EB-1485Fi

TK-Team has developed a hybrid screen/white board that in addition to the 16:9 ratio 90" or 16:6 ratio 120" image has an extended surface for the mounting of the EB-1485Fi finger touch module. Screen surface is extended beyond the image size to Epson's specific no fly zone requirements for calibration.

TK-Team have reduced the GU rating on their dry wipe enamel steel surfaces enabling the surface to be suitable both as a projection screen and a dry-wipe writing surface.

Whether you are using your finger, an interactive stylus or dry-wipe pens no special cleaning is needed.

Can be used as a standalone magnetic dry-wipe writing surface
Suitable for use with all short or ultra-short throw projectors.

- Combine your screen and magnetic dry-wipe writing surface
- Trimmed in black to increase contrast
- The screen has six-point fixings to ensure it is fully adjustable for calibration
- Made from minimum 50% post-consumer and post-industrial waste
- The product is recyclable
- The T90" has an image size 2010 x 1130 mm with an overall size inc trim of 2200 x 1210 mm
- The T120" has an image size 2850 x 1070 mm with an overall size inc trim of 3050 x 1210 mm
- 25-year warranty

You design -we make it happen
